

— A BUILDER MOVEMENT BEGINS

AI Builders *Hackathon*

Build. ♦ Ship. ♦ Launch.

KICKOFF

Monday · 7:00 PM IST

COHORT 01 · ONLINE · WORLDWIDE

DURATION

7 Days · Build in Public

— HOW WE GOT TO THIS ROOM

From ten thousand *to you.*

STAGE 01

10,000

Entries received

STAGE 02

3,500

Qualified, round one

STAGE 03 • NOW

1,000

Shortlisted builders — that's you.

The top 10%. Hand-picked. In this room.

Welcome, *builders.*

01

AI products launched

02

Portfolios built

03

Founders discovered

04

Ideas become real

*“You should have something **live** by the end of the next 7 days.”*

— WHY THIS HACKATHON EXISTS

AI has changed
how products
get built.

1×

One person can build what
once required an entire
team

2h

Prototypes you can show
in an afternoon

24/7

Agents that automate the
workflow around you

7d

From idea to launched
product, in public

• Learn by building

• Ship publicly

• Become AI-native

• Build real products

WHY OPENAI × OUTSKILL

Two ecosystems. *One launchpad.*

THE ENGINE

- ◆ Frontier AI models & APIs
- ◆ The Codex ecosystem
- ◆ AI-native workflows
- ◆ The future of software

THE LAUNCHPAD

- ◆ A builder community
- ◆ Mentors who've shipped
- ◆ A culture of shipping
- ◆ An execution ecosystem

*“Helping builders launch real AI products **fast.**”*

We are *early* in the AI-native era.

01

Solo builders are winning.

02

Distribution is open.

03

Execution is cheap.

04

Startups move faster.

*“This is your chance to be **early** in the AI wave.”*

Three stages, *one launch*.

PHASE 01

DAYS 1-2 • MON-TUE

• NOW

Start building

- Lock the idea
- Sharpen the scope
- Stand up the MVP shell

PROGRESS

35%

PHASE 02

DAY 3 •
WEDNESDAY

• UP
NEXT

MVP checkpoint

- First MVP submitted
- Screens & user flow
- Feedback round

CHECKPOINT

70%

PHASE 03

DAY 5 • FRIDAY

* LAUNCH

Final ship

- Working prototype
- Demo-ready product
- Submission + walkthrough

SHIPPED

100%

BUILDER EXPECTATIONS

Show up *like a founder.*

✓ WHAT WE WANT

Fast execution

Active experimentation

A shipping mindset

Product thinking

✕ WHAT WE DON'T WANT

Overengineering

Perfectionism

Massive feature lists

Endless planning

Speed + usefulness **wins.**

Five lenses. *Scored out of 100.*

01

Technical execution

Does the project work, and is it technically credible?

25 PTS

02

Usefulness

Does it solve a real developer, workflow, or user problem?

25 PTS

03

Creativity & originality

Is the idea or implementation distinctive?

20 PTS

04

Codex usage

Did the builder meaningfully use Codex, not just mention it?

20 PTS

05

Presentation clarity

Is the demo clear and easy to understand?

10 PTS

Two builders. *One mindset wins.*

WINNING BUILDERS

- 01 One clear problem
- 02 Narrow but useful
- 03 Ship early
- 04 Demo clearly
- 05 Collect feedback

STRUGGLING BUILDERS

- 01 Overbuild
- 02 Keep changing ideas
- 03 Delay the MVP
- 04 Over-design
- 05 Wait for permission

BUILD LIKE A STARTUP

DON'T ASK

*“What cool AI
can I use?”*

ASK

“What painful
problem can I
solve?”

WINNING PRODUCTS

Save time

Automate work

Reduce friction

Increase speed

Improve quality

— BUILD IN PUBLIC

90%

of products fail because of *poor distribution*.

01

Post daily progress

A screen, a clip, a paragraph — every single day.

02

Twitter + LinkedIn momentum

Two channels, consistent voice, compounding reach.

03

Build an audience while building

Your first 100 followers are your first 100 users.

04

Public feedback loops

Validate before you commit; iterate on real signal.

05

Daily check-in

Optional but recommended. Public momentum is the moat.

SUBMISSION REQUIREMENTS

Two checkpoints. *One launch.*

DAY 3 • CHECKPOINT

Wednesday

11:59 PM IST

✓ Product brief

✓ One-pager investor pitch

✓ MVP screenshots

✓ User flow diagram

DAY 5 • LAUNCH

Friday

LAUNCH DAY

✓ Research + idea validation

✓ Working prototype link

✓ Demo walkthrough video

✓ *Public launch post*

You're not building *alone*.

A command center, *always on.*

LIVE SESSIONS

Unlocking *hours*

Bring your bug, your design dilemma, your stuck idea. We'll work it through live.

Wednesday session 7 PM IST

Friday session

MENTORSHIP

ecosystem

SHORTLISTED ONLY

Luma access — *an invite into the room*

VIP ROSTER ◆◆◆

Play fair. *Build real.*

POLICY 01

Build during the hackathon

No pre-built submissions. We're building something new this week.

POLICY 02

Responsible AI usage

No harmful, deceptive, or illegal use. Be a good citizen of the ecosystem.

POLICY 03

Originality

Your idea. Your code.
Your shipping muscle.

POLICY 04

No plagiarism

Credit your inspiration.
Use libraries openly.
Don't copy entire codebases.

POLICY 05

No fake demos

If it's a mock, say so. If it's live, prove it. Trust compounds.

Momentum *over perfection.*

-
- | | | | |
|-------------------|----------------------|---------------|--------------|
| 01 | 02 | 03 | 04 |
| Build real things | Make useful products | Ship publicly | Iterate fast |

— WHAT IS ON THE TABLE

OUTCOME	OUTCOME	OUTCOME	OUTCOME	OUTCOME
Your first AI product	First customers	Startup ideas	Portfolio projects	<i>A career inflection</i>

This is *your time*
to build.

OPEN FLOOR

Questions?

Build. Ship. *Launch.*

See you inside the **community.**
